Survey - Bellary district - Bellary taluk - Janikunta village - S. No. 326 and Hargandona village - S. No. 311 - unsurveyed portions - fixing up of correct boundaries - report submitted.

Ref: Arising.

Mr. Gadzar of Calcutta and one Dasaratha Ramireddy of Guntur applied for surveying the mining area of S.No.326 of Janikunta village and S. No. 311 of Haraganadona village of Bellary taluk. These two fields are unsurveyed blocks and are adjacent to each other. The southern boundary of these two fields touches S. No. 3 of V.No.34 Tumati of Hospet taluk. This field also is an unsurveyed block. The common boundary of the two taluks of Bellary and Hospet in respect of the three villages, namely, Hargandona, Janikunta and Tumati, had to be fixed As there was no data available in the field measurement books in any of these three villages, the Assistant Director in charge of Central Survey Office, Madras was addressed to furnish the information. He has reported that the information called for is not available.

2. These three fields are big hill blocks covering an extent of 1200 acres and are registered as Revenue fields in the Village Accounts. The length of these three fields is about 2½ miles.

The demarcation of the Taluk boundary cannot be entrusted to a Deputy Surveyor. The work will occupy a Deputy Surveyor for 3 months to survey and the Inspecting Tahsildar cannot attend to this work in addition to his legitimate work.

For the above reasons, I request that a Head Surveyor may be deputed for a period of three months for the survey of the above three fields.

The Collr is furnished with a sketch showing the relative positions of the three survey fields referred to in this letter under reference. There are no independent traverse plotted data for any of these fields. The Collr states that a distance of 2½ miles of the taluk boundary should be surveyed. Traverse data are available for the lines A to B and B to C and the Collr presumably would also want the completing traverse data, fieldwork for S.No 311 of Haraganduna village and S.No. 326 of Tamirkunda village

Data are wanting for the Taluk boundary C to D and for the Common Village boundary D to E. The Collr. is requested to have the marks verified and to report exactly the area involved in the Mining operations whether S.No. 3 of Tumaki village is also included herein, and if so to specify the boundaries which have lately emerged. Mr Rao examined the sketch and explained

Survey - Bellary district and taluk - Janikunta village - S. No. 326 and Haragandona village - S. No. 311 unsurveyed portions - Fixing up of correct boundaries - Report submitted.

Ref: Your Ref. No. 332/40, dated 4-3-1940.

The sketch received with the reference cited above is enclosed, together with a plotted sketch of S.No. 326 of Janikunta village.

2. Plottable data for D-E are available as S.No.572 of Belagallu village has been surveyed.

3. The area involved in the mining operations is noted below. S. No. 3 of Tumati village is also included in it.

Haragandona	S.No.	311	472.32 acres
Janikunta	"	326	453.12 "
Tumati	"	3	288.00
		Total ...	1213.54 acres

The boundaries of S. No. 326 of Janikunta (from B to C marked in pencil and C to D & E marked in ink) have been laid out according to the measurements and angles scaled out from the plotted sketch so that there will be no difference in the registered area.

4. The southern boundary of S. No. 3 of Tumati village has been demarcated and surveyed. The remaining

5. The boundary from A to B, B to C and C to D has to be surveyed and the length of this line is about 2½ miles as already reported.

pp 1 to 2 CF

. N 332-40 [Coll Bellary Report 416-40 Pt
Dt 24. 1.40]

T

AD.S.R.A

In connection with certain
mining proposals the Coll of
Bellary points out that the
common boundary of the two
talukas of Bellary and Hospet
should be plaid and that the
two fields S.No. 326 of Jani kunta
village and S.No. 311 of Haraganadona
village as also S.No. 3 of Tumati
village of Hospet taluk which
touches them should be surveyed.
It is not clear why the third field
which apparently is not included
in the mining proposals requires
a detailed survey. As the survey
of the taluk boundary in these Districts
now the Coll recommends that
that survey might be deferred

for these months from among other three fields referred to by the Collr. Before sanctioning the Collr's proposals the file may, perhaps, be sent to C.S.O for a note on the work involved and a check given whether the work may not conveniently be entrusted to the survey Party.

as 30/1/40 — 31.1.40

B.J.C.

F 6/3/r

A sketch is put up showing the relative positions of (P)

S.No 311. Hanaganadona village } Bellary Taluk
S.No 326 - Tanikunta village }

and

S.No 3 Tumati village - Hospet Taluk.

There is no independent traverse plottable data for any of these fields.

From the letter of the Collector it would

seem that the Taluk boundary requires to be surveyed the distance is said to be 2½ miles.

For Part of the Taluk boundary traverse data is available i.e. from A to B & B to C

But presumably the Collector would also want the completing of the traverse data, field work for S. Nos 311 Hanaganadona, & S. No 326 Tanikunta.

As will be seen from the sketch traverse data is lacking for the common village boundary B G.

The Taluk boundary for which data is wanting is the line C to D

The portion D to E is coterminous with Bellagallu village. S. No 572 adjoins. From the notation it looks

as if this is a forest survey field. If so, there may be data for the Section D E.

The Collector may therefore be requested to ~~may~~ verify this and with reference to the sketch asked to report the boundaries which require to be Surveyed

In the Earlier reference made to CO ~~the Collector~~ wanted traverse data only for S. No 311 of Nagasamadona village. A sketch was sent with the data as far as available Entered therein with an intimation that there was no data for the Eastern boundary i.e. B G on the Sketch.

In his letter, the Collector seemingly includes the area of S. No 3 of Tumati

presumably the expression "unsurveyed block, for purpose of this reference, is taken to be restricted only to the northern boundary of S. No 3 which has no traverse data - Line C-D in the sketch.

If the area of S. No 3 is also to form part of the Compact mining block the Collector may be requested to say if for the rest of the boundaries of S. No 3, traverse data is available in the maintained Tuck & if not to intimate with a sketch the lines for which data has to be furnished. This will be examined in CO & if the data is insufficient, the the lines concerned will then have to be included for survey.

It is not therefore feasible to examine at this stage

the Collector's proposed
Estimate of 3 months
to complete the work.
The Collector may be
asked to return the
sketch with his reply

E to n/a

In para 5 of his letter the Collector states that the boundary to be surveyed is from A to B, B to C, & C to D.

This is not quite correct. The boundary for survey is A to B (B-C) and C-D-E (C-D). The line BC is traversed surveyed & has been shown thus in the sketch from Co In the Collector's sketch measurements are entered for BC

The total length of the lines for survey is about 148 chains about 1 3/4 miles.

The work may be entrusted to No II Party he 30/4

AD.S.ER.

Please see the note of A.D Co. above p7 C.F. It would appear from the note that only a distance of 1 3/4 miles requires to be boundary surveyed consisting of the two lines B to C and C to D of the length of 48 chains and 1250 chains respectively in the Co. sketch at (O). and not 2½ miles as reported by the Collr. in para 5 of his letter at p6 C.F. In the circumstances it is for orders whether the Collr. may be told of the actual lines to be measured and whether the work may not be entrusted asked to the Deputy surveyor.
